Contracts In Force (CIF) History: Rolling 12 Months

Data as of: 1/31/2019

Filtered by:
State: All

DO NOT DISTRIBUTE

Report Description

This report is the replacement of the legacy report: "CIF: Rolling 12 Months".

This report provides the Contracts-In-Force totals from the current Calendar Month/Year back to the previous year and Growth (with percentage) of contract totals compared to the previous year.

Contracts In Force (CIF) History: Rolling 12 Months

Data as of: 1/31/2019

FEMA

Data Dictionary

Description	Definition
As of Date	The as of date is the date at which the data is current.
Contract Count	The contract count is the number of contracts in force as of the date listed in the report for the given combination of state and other attributes represented in the filters.
Growth	Growth represents the growth in contracts or policy count (as appropriate) from the same month 1 year prior.
Growth %	Growth percentage represents the percentage growth in contract or policy count (as appropriate) from the same month 1 year prior.
State Name	The state name is the state as determined by geocoding the policy.

PART Data Disclaimer

This report is generated from the NFIP Pivot Analytical Reporting Tool (PART). PART will be the comprehensive source for reporting, business intelligence, and data visualization for NFIP, and will begin to replace legacy BureauNet and Data Exchange reports starting in November, 2018. The underlying NFIP data used in PART comes from 2 primary sources:

1. Transaction Record Reporting and Processing (TRRP): TRRP is the legacy mainframe system whose data is used to populate legacy reports (i.e., BureauNet and Data Exchange reports) and the source of PART reporting. PART data is consistent nationally to within about 0.02% of legacy TRRP data (some exceptions noted below). Smaller subsets of data (e.g., reporting on individual communities) may show larger differences due to the smaller sample sizes. Three exceptions where PART data may differ from legacy system-generated reports are:

a. County Data: In the legacy reporting systems, county information was derived solely from the community number, and in the case of communities associated with multiple counties, all policies and claims in that community are associated with the first county alphabetically for that community. In the PART system, the county is determined by geocoding the address associated with the policy or claim (i.e., transforming a physical address into geographic coordinates). As a result, contracts or policies within the same community are assigned to different counties if they are located in different counties within the same NFIP community.

b. Number of Losses (Claims): Previously, about 1% of claims without payment losses were excluded from legacy reports as erroneous. Those losses are included in PART reports with the corresponding attributes as they exist in the data set, and they are indicated as closed without payment.

c. Claim Status for Reopened Claims: Some adjustments were made in the PART logic for those claims that result in a different claim status than existed in Data Exchange based upon the relationship between the claim's close date and reopen date. This change affects about 0.1% of claims records.

2. Underwriting Claims Operational Review Tool (UCORT): The UCORT system allows for claims data from our WYO partners and their vendors to be submitted outside the TRRP cycle on a daily basis. UCORT is a new data stream from our private sector partners and has not been through many of the quality controls that our legacy systems have built-in. As systems continue to be modernized under the PIVOT program, we will receive verified data more quickly. In the meantime, UCORT is our best source for daily operational claims information.

NOTE: All PART reports include a "Data as of" date that indicates when the data was loaded from the source system(s) into PART.

If you have any questions or comments regarding PART reporting, please contact ERPSI_PARTRPT_TEAM@fema.dhs.gov.

Report Description

This report is the replacement of the legacy report: "CIF: Rolling 12 Months".

This report provides the Contracts-In-Force totals from the current Calendar Month/Year back to the previous year and Growth (with percentage) of contract totals compared to the previous year.

Filters Provided: State, Ending Date Type and Ending Date
