

FEMA

NATIONAL FLOOD
INSURANCE PROGRAM

Policies in Force (PIF) By Occupancy Type/Flood Zone

Data as of: 1/31/2019

Filtered by:
State: All
Flood Zone Group: All
Occupancy Type: All

Previously Known as "W2RPCNTA" from BureauNet

DO NOT DISTRIBUTE

Report Description

This report provides the current Residential and Non-Residential Policies-In-Force Statistics, including Total Premium Paid (including Federal Policy Fee), and Total Coverage Amount.

Note: Flood Zone represents the zone that the policy was rated with, not necessarily the zone the property is mapped in.

Policies in Force (PIF) by Occupancy Type/Zone

Data as of: 1/31/2019

Filters:	State All	Occupancy Type All	Flood Zone All
-----------------	---------------------	------------------------------	--------------------------

State	Flood Zone Group	Single Family Dwelling Policies	2-4 Family Dwelling Policies	Other Residential Policies	Non-Residential Small Business Policies	Non-Residential Non-Small Business Policies	Non-Residential Business Policies	Policies in Force	Total Premium (inc. FPF)	Total Coverage Amount (in Hundreds)

Data Dictionary

Description	Definition
As of Date	The as of date is the date at which the data is current.
Flood Zone Group (policies)	Flood Zone Group represents a grouping of flood zones into categories. A includes all policies with an A zone, AE includes all policies with an AE or A01-A30 zone, AH includes AH and AHB zones, AO includes AO and AOB zones, AR includes AR, ARE, ARH, ARO, and ARA zones, A99 includes only A99 zones, D includes only D zones, V includes only V zones, VE includes VE and V01 to V30 zones, X includes X, B, and C zones, Emergency includes policies without a flood zone but with an E value for "program", BLK represents blank (null) flood zone values without an E value for program, and INV represents invalid flood zones, i.e., all other values.
Occupancy/Small Business (Policy Data)	The occupancy/small business header combines the occupancy and sm_bus_bldg fields. "Single Family" includes all policies with an occupancy code of 1. "Two-to-Four Family" includes all policies with an occupancy code of 2. "Other Residential" includes all policies with an occupancy code of 3. "Non-Residential Small Business" includes all policies with an occupancy code of 4 and a sm_bus_bldg value of Y. "Non-Residential Non-Small Business" includes all policies with an occupancy code of 4 and any other sm_bus_bldg values. "Non-Residential Business" includes all policies with an occupancy code of 6. "Unknown" includes all other policies.
Policies in Force	The number of policies in force for a given state and combination of attributes.
Premium + FPF	This represents the sum of the premium and FPF (federal policy fee) for the policies in force.
State Name	The state name is the state as determined by geocoding the policy.
Total Coverage Amount (in Hundreds)	The total amount of insurance coverage (in hundreds of dollars) for building, contents, and ICC for the policies in force.

PART Data Disclaimer

This report is generated from the NFIP Pivot Analytical Reporting Tool (PART). PART will be the comprehensive source for reporting, business intelligence, and data visualization for NFIP, and will begin to replace legacy BureauNet and Data Exchange reports starting in November, 2018. The underlying NFIP data used in PART comes from 2 primary sources:

1. Transaction Record Reporting and Processing (TRRP): TRRP is the legacy mainframe system whose data is used to populate legacy reports (i.e., BureauNet and Data Exchange reports) and the source of PART reporting. PART data is consistent nationally to within about 0.02% of legacy TRRP data (some exceptions noted below). Smaller subsets of data (e.g., reporting on individual communities) may show larger differences due to the smaller sample sizes. Three exceptions where PART data may differ from legacy system-generated reports are:

a. County Data: In the legacy reporting systems, county information was derived solely from the community number, and in the case of communities associated with multiple counties, all policies and claims in that community are associated with the first county alphabetically for that community. In the PART system, the county is determined by geocoding the address associated with the policy or claim (i.e., transforming a physical address into geographic coordinates). As a result, contracts or policies within the same community are assigned to different counties if they are located in different counties within the same NFIP community.

b. Number of Losses (Claims): Previously, about 1% of claims without payment losses were excluded from legacy reports as erroneous. Those losses are included in PART reports with the corresponding attributes as they exist in the data set, and they are indicated as closed without payment.

c. Claim Status for Reopened Claims: Some adjustments were made in the PART logic for those claims that result in a different claim status than existed in Data Exchange based upon the relationship between the claim's close date and reopen date. This change affects about 0.1% of claims records.

2. Underwriting Claims Operational Review Tool (UCORT): The UCORT system allows for claims data from our WYO partners and their vendors to be submitted outside the TRRP cycle on a daily basis. UCORT is a new data stream from our private sector partners and has not been through many of the quality controls that our legacy systems have built-in. As systems continue to be modernized under the PIVOT program, we will receive verified data more quickly. In the meantime, UCORT is our best source for daily operational claims information.

NOTE: All PART reports include a "Data as of" date that indicates when the data was loaded from the source system(s) into PART.

If you have any questions or comments regarding PART reporting, please contact ERPSI_PARTRPT_TEAM@fema.dhs.gov.

Report Description

This report is the replacement of the legacy report: "W2RPCNTA".

This report provides the current Residential and Non-Residential Policies-In-Force Statistics, including Total Premium Paid (including Federal Policy Fee), and Total Coverage Amount.

Filters Provided: State, Occupancy Type and Flood Zone

Note: Flood Zone represents the zone that the policy was rated with, not necessarily the zone the property is mapped in.
