

# NATIONAL FLOOD INSURANCE PROGRAM

**Bureau and Statistical Agent**

W-01078

2038-01

**MEMORANDUM TO:** Write Your Own (WYO) Principal Coordinators and the NFIP Servicing Agent

**FROM:** WYO Clearinghouse

**DATE:** December 11, 2001

**SUBJECT:** Use of the Standard Flood Hazard Determination Form

FEMA is in the process of obtaining review and clearance from the Office of Management and Budget for an extension to the expiration date of FEMA Form 81-93, Standard Flood Hazard Determination Form, as a part of the required reissuance of the form that expired on October 31, 2001. No changes to the form or the information collected are anticipated, but there may be some clarifications to the instructions based upon questions and feedback received over the past 2 years. The current form may be used until a Final Notice, with a new form expiration date, is published in the Federal Register.

Lenders are required to use this form when determining whether the improved real property offered as collateral for security for any federally regulated or insured loan, is or will be located in a special flood hazard area in which flood insurance is available. The Standard Flood Hazard Determination Form may be used in a printed, computerized, or electronic manner. The following link will take you to a copy of this form:
